AP/ECE, RMKCET

15.05.2020
11:00 AM

Dr. A GNANAVATHE
Director
IRA New Academy of Skills

STAY HOME : STAY SAFE : LEARN ONLINE

INTRODUCTION:

In the overview of the COVID-19 situation in our state and the country, we have had to take stringent lockdown measures for the safety of our family and society. But education and learning needs to be continued even in dire situations like the one we are enduring of late. The webinar focused on exams which are necessary for pursuing masters in abroad.

BRIEF REPORT:

1. Study abroad to explore a new culture

It is one thing to experience a country's culture when you visit for vacation, but it's completely different when you immerse yourself in the culture as you live and study there. Stepping out of India to study in a foreign country will open the door to cultural experiences, preparing for fafsa for international students, wes evaluation, unique customs, new languages and unfamiliar traditions. You become part of your new environment when you study abroad, contributing your own unique background and ideas while learning new customs and discovering new ways of doing things. Seeing the world through an open-minded perspective makes you a culturally aware global citizen, and that is a passport that will benefit you wherever you go.

2. Become More Responsible While Studying in a Foreign Country

Until now, you may have lived with your parents or guardians, but when you study abroad, you will be in charge of everything from your well-being to your education. You will be responsible for the decisions and the consequences that you face when you choose to study abroad. This independence will prove useful in the highly competitive career world and you will learn to enjoy the excitement of knowing that you are in control of your life.

3. Build a Network of Friends from Around the World

One of the most obvious reasons to study abroad is to meet people from different places. Creating an international circle of friends is a huge benefit of studying abroad – imagine having friends both in your home country and in the country you attend university. Imagine having two home countries! You become friends with people in your classes, on your sports teams, in your society, fraternity or sorority, or in your student organization. And these friends will forever be part of your most cherished memories from your time abroad.

4. Experience a different education style

Indian students used to a passive style of learning will get to experience a more engaging and active learning style when studying abroad. This may involve active learning through class participation, dialogue exchange, case studies and practical off- and on-campus experiences that make learning fun and meaningful. Who knows – maybe the key to unlocking your potential is in the way your future professor provides feedback or encourages student discussions in class, or maybe it is the size of the class or how much time you spend in the lab.

5. Stand Out to Future Employers with Your Academic Experience Abroad

Regardless of whether you choose to work in India or at a company abroad, your experience in a foreign country does matter to your future employer. It shows them that you can thrive and grow in an environment away from your comfort zone. As you open your mind and improve your language skills, studying abroad will also help you develop creative problem-solving skills, adapt to diverse environments and establish outstanding communication skills. These will stand out as your best selling points and will help you get closer to your dream job.

6. Improve Your English Skills No Matter What You Study Abroad

When you study abroad in the US, Canada, the UK, Ireland or the UAE, you are surrounded by English. Not only are your classes conducted in English, but you use English in your free time when you meet with friends and take part in activities on campus. Whether you study engineering, mathematics, political science or theater, your English skills will improve until you are fluent and your advanced multilingual skills will strengthen your CV. Depending on where you study, you might even pick up an accent.

KEY HIGHLIGHTS:

- ❖ Opportunities after COVID-19 to study in abroad.
- ❖ What are all the exams to be written to get admission?
- ❖ How to prepare for GRE, TOEFL and IELTS?
- ❖ Sources for exam preparation
- ❖ Time management during exam
- ❖ Minimum cut off required in each exam

The screenshot shows a Cisco Webex Meeting window. The main content is a presentation slide titled "VERBAL REASONING contd....". The slide text is as follows:

TIME MANAGEMENT:
20 Questions– 30 Minutes
First solve **All** the Sentence Questions in **10 -12 Minutes**
Then Solve Small Passages
Finally Solve Big Passages
(Remember Small & Big Passages are NOT given in order in the test)
Between every section there is a break of **one minute** and after one and half hour, there will be a break for **10 minutes** break.
Practice Tests – ets.org gives 2 free tests. After registering you will get 2 more tests. You get an online calculator.

At the bottom of the slide, there is a watermark: "Dr A New Academy Skills, org2017@g...com".

The meeting interface includes a top menu (File, Edit, Share, View, Audio, Participant, Meeting, Help), a video gallery with participants (Arun, Dr A Gnanavathe, ARS, Arun, Mohamed Ibrahim), a participants list on the right (10 participants), and a chat window with a message: "you can interact with the speaker... from Dr A Gnanavathe to everyone: Good morning Everone ! from Arun to everyone: lecture will start by 11am".
